

Taxi Vehicle Permits

Follow these instructions to apply your Taxi Vehicle Permits

Permit application instructions

1. These pressure sensitive markings must be applied to a clean and dry glass, non-waxed surface. Surface temperature should be at least +10° Celsius. Clean the area thoroughly with rubbing alcohol or soap and water. Do not use Windex or similar products because it will leave a residue behind that will prevent the sticker from adhering well.
2. Remove the smallest portion slit backing. Position the sticker on the outside of your rear window, on the bottom left corner as shown above. Lightly tack down the exposed portion of the graphics. Remove all air pockets from beneath this small section by squeegeeing carefully from the centre to the outside edges.
3. Carefully apply the remainder of the sticker by slowly pulling the backing paper away from underneath the graphics, about 2-3 inches at a time. While at the same time squeegeeing the sticker in the direction the backing paper is being removed. Use short, firm overlapping squeegee strokes. Work from the centre to the outside edges, or from the top to the bottom. Once sticker is applied carefully remove the mask leaving the sticker in place.
4. Re-squeegee all edges to be sure they have been properly applied.

Place permit on bottom-left corner of the rear window (outside).

If renewing existing permit

1. Remove **only** the date section from perforated area on the existing sticker.
2. Apply new date portion as seen in the diagram to the right.

KEEP EXISTING PORTION
