

# BACKGROUND – Q & A

---

**1. What is the total value of the golf course lands?**

As part of the MOA, the land will be assessed to determine its value.

**2. How much is this costing taxpayers?**

It is too early to provide specific costs, however, under the Memorandum of Agreement, the full scope of the project will be assessed and work would be aligned where possible with other projects to mitigate costs.

**3. When is this taking place?**

The process will commence with the signing of a Memorandum of Agreement that is non-binding. Agreement negotiations would begin after that and would define timelines. Some capital improvements could take place beginning in 2020.

**4. How will this impact current membership?**

This has not yet been determined and will be determined as part of the MOA. The City and Club will work together to establish the operational model to ensure success of the operations.

**5. What happens to the board?**

The board will continue to serve as it always has and will be responsible for ongoing operations including hiring of staff and ensuring all maintenance and operations meet golfing standards. The only potential change is that the City may have representation on the board to ensure that the City's best interests are a priority.
