

SORT ORGANICS CORRECTLY

Thanks to the many residents who sort correctly. You are helping contain costs and helping the environment.

However, a growing number of residents are putting garbage in their green carts – contaminating the whole truckload of organics.

Contaminated loads are rejected by our organic processor and must be trucked back to Leduc to be landfilled. The city pays higher costs to landfill than it does to compost.

NEED AN EXTRA WASTE CART?

If you routinely generate more waste than your black waste cart can handle, rent an extra waste cart for \$12.25/month.

GREEN organics cart

- All food scraps
- Yard waste & plant materials
- Soiled tissues
- Shredded paper
- Food soiled paper & cardboard boxes
- Pet waste (in compostable bags)
- **NEVER** put plastic bags or garbage in your green cart.

Recycle Coach

FREE sorting and calendar app available from the Apple App Store or Google Play.

Sorting Wheel

Updated wheels are available by calling the Eco-smart Hotline.

A-Z Sort Smart Database

Online at Leduc.ca

Green carts are manually inspected on an ongoing basis by City staff and the collection contractor.

Additional inspections will take place the week of November 9 on your collection day.

Please ensure your green cart contains acceptable items only. Contaminated carts will not be collected. Call the Eco-smart Hotline at 780.980.7107 with any questions.
